## Agenda

## Inter-Tribal Monitoring Data Group Annual Meeting February 13, 2024

		Agenda
Time	Title	Presenters
8:15	Welcome	Donella Miller, Department Manager, Fishery Science, CRITFC
8:30	West Coast Ocean Alliance (WCOA) Data Portal status & plans: Building a Better Data Portal	Laura Bliss, Ph.D., Project Coordinator and Andy Lanier, Co-Director West Coast Ocean Data Portal <a href="mailto:Laura.Bliss@westcoastcoceanalliance.org">Laura.Bliss@westcoastcoceanalliance.org</a> , <a href="mailto:Andy.Lanier@dlcd.oregon.gov">Andy.Lanier@dlcd.oregon.gov</a> <a href="http://portal.westcoastcoceans.org">portal.westcoastcoceans.org</a> <a href="http://www.westcoastcoceanalliance.org">www.westcoastcoceanalliance.org</a>
9:10	Budget Status: BPA and NOAA funding	Sheryn Olson, ITMD Project Coordinator, CRITFC
9:25	NOAA Grant Update: Enhancing Data Management Capacity among the CRITFC, its Four Member Tribes, and the WCOA	Mary Rose (Rosie) Gradoville, PhD, Oceanographer, Coastal Margin and Observation Prediction Program and Jiaming Yang, PhD, Data Systems Specialist, CRITFC
9:40	Legacy Dataset Preparation for digitization	Christine Longjohn, Biologist, Confederated Tribes of the Warm Springs Reservation of Oregon (CTWSRO)
10:00	BREAK 10 minutes	
10:10	A New Tribal Data Management Working Group: Progress and Lessons Learned	Stefan Kelly, Watershed Restoration Coordinator, CTWSRO
10:25	NWIFC Tribal Water Quality Data Exchange and the Information Management Platform	Bruce Jones, Salmon and Steelhead Habitat Inventory and Assessment Program Section Mgr., Northwest Indian Fisheries Commission
10:55	BREAK 10 minutes	
11:00	ITMD Discussion	<a href="#">5-year strategy 2024 update</a> Objectives: Are they Specific, Measurable, Achievable, Relevant, Time-bound? Timeline thoughts Work planning: Next topics for improvement-Metadata! All topics discussion
12:15	Adjourn	

# Inter-Tribal Monitoring Data Project

Bonneville Power Administration/Accords Project 2008-507-00

with support from EPA Exchange Network grant 2017-2019 and NOAA Tribal Engagement grant 2023-2024

*Coordination and collaboration are important to continue discussion amongst the four tribes; we can minimize 're-inventing the wheel' and maximize our time and resources to build and maintain our data systems."*

*--- An ITMD group member*

February 13, 2024

# Inter-Tribal Monitoring Data Project

Bonneville Power Administration/Accords Project 2008-507-00

with support from EPA Exchange Network grant 2017-2019 and NOAA Tribal Engagement grant 2023-2024

*“Coordination and collaboration are important to continue discussion amongst the four tribes;  
we can minimize ‘re-inventing the wheel’ and  
maximize our time and resources to build and maintain our data systems.”*

*--- An ITMD group member*

## The ITMD Project Group 2010-2023

### CTWSRO

Amy Charette  
Javin Dimmick  
Craig Graham  
Lyman Jim  
Stefan Kelly  
Christine Longjohn  
Richard McConville  
Lauren Osborne

### CTUIR

Ken Burcham  
George Clark  
Colette Coiner  
Stacy Schumacher  
**NPT**  
Ryan Kinzer  
Samantha Smith  
Tyler Stright  
Clark Watry

### YN

Michael Babcock  
Bill Bosch  
Vaughan Gilmore  
Tom Iverson  
Anneliese Myers  
Michelle Steg

### CRITFC

Ryan Branstetter  
Jayson FiveCrows  
Henry Franzoni  
Rosie Gradoville  
David Graves  
Doug Hatch  
Casey Justice  
Denise Kelsey  
Donella Miller

### CRITFC

Joe Nowinski  
Hayley Nuetzel  
Sheryn Olson  
Zach Penney  
Anna Ringelman  
Colleen Roe  
Charles Seaton  
Tami Wilkerson  
Jiaming Yang

*Thank You to the many participants past and present*

February 13, 2024

## Agenda

# Inter-Tribal Monitoring Data Group Annual Meeting February 13, 2024

	Title	Presenters
8:15	Welcome	Donella Miller, Department Manager, Fishery Science, CRITFC
8:30	West Coast Ocean Alliance (WCOA) Data Portal status & plans: Building a Better Data Portal	Laura Bliss, Ph.D., Project Coordinator and Andy Lanier, Co-Director West Coast Ocean Data Portal <a href="mailto:Laura.Bliss@westcoastcoceanalliance.org">Laura.Bliss@westcoastcoceanalliance.org</a> , <a href="mailto:Andy.Lanier@dlcd.oregon.gov">Andy.Lanier@dlcd.oregon.gov</a> <a href="http://portal.westcoastcoceans.org">portal.westcoastcoceans.org</a> <a href="http://www.westcoastcoceanalliance.org">www.westcoastcoceanalliance.org</a>
9:10	Budget Status: BPA and NOAA funding	Sheryn Olson, ITMD Project Coordinator, CRITFC
9:25	NOAA Grant Update: Enhancing Data Management Capacity among the CRITFC, its Four Member Tribes, and the WCOA	Mary Rose (Rosie) Gradoville, PhD, Oceanographer, Coastal Margin and Observation Prediction Program and Jiaming Yang, PhD, Data Systems Specialist, CRITFC
9:40	Legacy Dataset Preparation for digitization	Christine Longjohn, Biologist, Confederated Tribes of the Warm Springs Reservation of Oregon (CTWSRO)
<b>10:00</b>		<b>BREAK 10 minutes</b>
10:10	A New Tribal Data Management Working Group: Progress and Lessons Learned	Stefan Kelly, Watershed Restoration Coordinator, CTWSRO
10:25	NWIFC Tribal Water Quality Data Exchange and the Information Management Platform	Bruce Jones, Salmon and Steelhead Habitat Inventory and Assessment Program Section Mgr., Northwest Indian Fisheries Commission
10:55		BREAK 5 minutes
11:00	ITMD Discussion	<a href="#">5-year strategy 2024 update</a> Objectives: Are they Specific, Measurable, Achievable, Relevant, Time-bound? Timeline thoughts Work planning: Next topics for improvement-Metadata! All topics discussion
12:15		Adjourn

## *A Discussion. ITMD then ...*

- ITMD Project's first 10 years:
  - Needs assessments
  - Develop hardware and software infrastructure at CRITFC's four member tribes and at CRITFC
- Spring 2020, members updated ITMD mission focus:
  - Maintain, upgrade, improve the tribes' software Database Management Systems
  - Tribal Coordination and Collaboration foremost, and
    - Reduce or Eliminate Data Steward roles for projects within CRITFC
    - Eliminate the CRITFC-wide computer/IT funding and support roles

## *ITMD now and Future ...*

Late 2021 –ITMD group wrote a Five-Year strategy 2022-2026,  
approved February 2022

This serves as a work plan, a playbook

Updated in 2023, and now [ITMD Five Year Plan 2022- 2026, 2024 Update](#)

Today, considering.... The five-year plan and a technical team for metadata

# *ITMD now and Future ... Questions for Discussion*

## ITMD Five Year Plan 2022- 2026, 2024 Update

- Do you think the goals and objectives are still relevant and in line with your tribe's priorities for the project? (p. 6) Are they Achievable?
- Is the timeline of tasks feasible given our resources? (10)
- Do you want to update the SWOT analysis? (21)

# *ITMD Futures: A Technical Team. A Discussion*

## Metadata: How can it serve us ?

- New tech team formed to explore metadata, [notes of 1<sup>st</sup> meeting here](#).  
In folder: [Metadata](#)
- The folder has a preliminary report that Jammin Y wrote.
- Most of that info is in the [NOAA grant performance report Appendix A](#).
- Everyone came to the meeting with a long list of “needs and wants”!

NEXT steps??

## Metadata: How can it serve us ?

Inter-Tribal  
Monitoring Data Group  
Annual Meeting  
February 13, 2024

NEXT steps?? Proposed process...

1. *determine what **functions** we require that need metadata support, such as*
  - **descriptive** (contextual) metadata – to enable identification, discovery, access, re-usability, e.g. ?
  - **administrative** metadata – to assist preservation, rights, and appropriate usage?
  - **structural** metadata – to enable machine processing, such as to build citations & metadata reports, or allow Application Programming Interfaces (APIs) to transfer datasets? These metadata ensure data exchange standards (DESS) that are machine and human readable fields. They are necessary for current repositories to interact with many data repositories. See [Semantic Primer](#).
2. Assess our current repositories' existing metadata and metadata gaps.
3. Map redundant metadata fields in our tables, then revise, or add metadata fields for our required uses.
4. Develop the ability for users to *search metadata, then produce reports for metadata* across projects for better collaboration. This is a high priority and is in progress.
5. Develop machine readable metadata to better allow API data transfer among repositories.

NOAA grant [performance report here](#).

## Metadata: How can it serve us ?

Inter-Tribal  
Monitoring Data Group  
Annual Meeting  
February 13, 2024

NEXT steps?? Some digging into the systems.

- Each tribe and CRITFC evaluates the existing metadata in your data management system.
- Identify strengths (very useful universal terms?) and weaknesses (missing values in metadata fields? Need more mandatory fields?, More fields?)
- Everyone compile a list of short-term – what can we do now with existing systems? and long-term metadata improvement requests.
- We come back with our reports to discuss and plan.

NOAA grant [performance report here.](#)

*Thank You*

Cascade Locks

*Fiona Morrison 2022*

# *TMD now and Future ... Some of your thoughts from 2022*

## **Scope**    **End Goals**

Data systems are essential to our research, monitoring, and evaluation work.

- We are working to build data systems from front-end field data capture to back-end service of the data via web query and csv download. The end-product goal is a web-based back-end data repository that project researchers are comfortable using and querying and know that the data retrieved are “the best available” data. This needs to be internal first (tribes and CRITFC) so that we know project researchers understand the “nuances” of the data. However, some data sets, like dam, trap, or weir counts, can be public.
- By 2027, we are hoping we will be >90% of the way there with respect to dam/trap count, dam/trap sample, hatchery growth/survival/release, Yakima steelhead kelt, and possibly other data sets.
- Seamless interface of these systems with PTAGIS by 2027 as well.
- Independent of external support (i.e., self-sufficient)
- Able to support a full data management team (incl programmer/developer) Ideally, everything would be set and we wouldn't be reliant on a consultant to manage this.

# *TMD now and Future ... Some of your thoughts from 2022*

## **Scope, End Goals      Broad Questions**

- Tricky since not all tribes use the same system - develop microservices to be universal, where possible, to the different systems in use - in general, I think ITMD should focus on similarities/common goals/objectives since this is where we can find the most efficient and effective solutions, not differences.
- Coordination and collaboration are important to continue to facilitate discussion amongst the four tribes so that we minimize “re-invent the wheel” and maximize use of our time and resources to build and maintain our data systems.
- While standardization amongst the four tribes and CRITFC has many benefits, it does not seem feasible due to development that has already occurred and to differences in the way the four tribes’ natural resources departments are structured and operate.
